

This year we carefully created a PU leather handle coffee tin box for the coffee brand. The size is 185x136x85mm. It is made of food-grade tinplate and the material thickness is 0.23mm.

Luxury touch, full of dignity

The outer layer is made of high-grade PU leather material, which is delicate and warm to the touch, just like the early autumn sunshine, warm and not dazzling. This material not only gives the tin box an unparalleled texture, but also conveys a low-key and luxurious atmosphere every time it is opened and closed. Whether it is for personal use or as a gift, it can make people feel your unique taste and deep friendship.

Sturdy iron box, fresh and fragrant

The tin box design inside is the ultimate protection of coffee quality. The iron material effectively isolates external light, moisture and odor, ensuring that each coffee bean can maintain its original freshness and mellowness. Whether it is the convenience of grinding and enjoying immediately, or the collection of long-term storage, the aroma and flavor of coffee can be best preserved.

Exquisite design, artistic enjoyment

In terms of design, we combine modern simplicity with retro style, smooth lines, harmonious color matching, and every detail reveals the craftsman's careful carving. Whether it is placed on the desk or in a corner of the living room, it can become a pleasing decoration, adding an extraordinary artistic atmosphere to the living space.

Diverse choices

This series of PU leather [coffee tin boxes](#) has a variety of box types to choose from, from classic squares to irregular shapes, to round shapes, there is always one that can touch your heartstrings. Each coffee iron box has been strictly screened, just to give you high-quality packaging box coffee.
