

Production Process and Business Introduction of Triangular Tin Box

The **triangular mint tin box** produced by China Tin Box Supplier is one of the popular candy packaging solutions on the market. This triangular tin box is made of tinplate with a thickness of 0.23 mm. It not only has good sealing, but also can effectively prevent candy from getting damp and deteriorating, and maintain the freshness of food. The size of the tin box is 71x60x70 mm, which can hold 150 grams of mints, ensuring a moderate capacity and suitable for multiple purposes such as home, party and holiday gifts.

In order to enhance the user experience, the triangular tin box is equipped with a blister tray, which not only stabilizes the biscuits and prevents damage during transportation, but also makes the overall packaging more upscale. The printing of the box body is mainly milky white, conveying a festive and warm atmosphere, which is very suitable for festivals or special occasions. The surface of the tin box is printed with exquisite pictures, and the meticulous printing process shows the attractive texture of the biscuits and attracts the attention of consumers.

Production process

Design and proofing: In the early stage of the production of the triangular tin box, the factory's design team will customize the design plan according to customer needs, select the color and pattern that matches the brand image, and use advanced printing technology for fine image printing.

Stamping: After the proofing is confirmed, high-precision stamping equipment is used in the production process to stamp the tinplate material into the required box shape.

Inner tray molding and installation: The production of blister inner trays uses materials that meet food safety standards. After hot pressing, they are accurately embedded in the tin box to ensure the stability of cookies during transportation and storage.

Quality inspection and packaging: Each finished tin box undergoes strict quality inspections, including sealing, printing clarity and structural stability, to ensure that the final delivered product

meets high standards.

Business advantages

As a [**Chinese tin box supplier**](#) with many years of experience, we not only have advanced equipment and technology in tin box production, but also have a professional design team to provide customers with full-service from design, proofing to mass production. We are committed to creating high-quality, unique and brand-compliant product packaging for customers to help them stand out in the fierce market competition.

Whether it is a triangular mint candy tin box or other food packaging solutions, we can provide flexible design and production services to meet the personalized needs of different customers. Our tin box products not only meet international food safety standards, but also have passed multiple quality certifications and are trusted by domestic and foreign customers.

Through exquisite craftsmanship and strict quality management, our triangular tin boxes can not only enhance the added value of products, but also bring wider market recognition to customers' brands.
