

## Production process and design features of double layer gift tin box

**China Tin Box Factory** is famous for its excellent craftsmanship and high-quality products. Our latest double-layer gift tin box is made of high-quality tinplate, with exquisite appearance and practical design, becoming a popular gift packaging choice on the market. The following is a detailed production introduction of this double-layer gift tin box.

### Selection of high-quality materials

This double layer gift tin box uses high-quality tinplate, with a size of 295x205x162 mm. Tinplate has become an ideal material for gift tin boxes with its excellent anti-rust performance and strong and durable characteristics. Through careful selection and strict screening, we ensure that each piece of tinplate material meets high standards of quality requirements, laying a solid foundation for the subsequent processing of the tin box.

### Precision design and production of double-layer structure

The double-layer design is a notable feature of this gift tin box, which can provide sufficient storage space for various gifts without being bulky. In order to ensure the stability of the double-layer structure and the durability of the box body, we use advanced stamping and forming technology. During the production process, the size and shape of each layer are accurately calculated and debugged to ensure that the upper and lower layers of the tin box can fit perfectly without misalignment or looseness.

### Matching of exquisite handbags

In order to enhance the overall beauty and practicality of the gift tin box, we specially designed a matching exquisite handbag for this tin box. The handbag is made of high-grade materials, feels comfortable, has strong load-bearing capacity, and can easily carry a tin box full of gifts. The design of the handbag echoes the appearance of the tin box, and the overall style is unified, bringing a pleasant visual experience to the user.

### **Exquisite appearance design**

In terms of appearance design, our design team fully considered the needs of the gift market and added unique aesthetic elements to the tin box. Both the printed pattern on the surface and the overall color matching have been modified and improved many times. The printing process adopts advanced CMYK four-color printing technology, with rich colors and clear patterns, making the tin box not only practical but also decorative.

### **Strict quality control and careful packaging**

Every double-layer gift tin box must undergo strict quality inspection in multiple processes during the production process. We strictly control every step from the entry of raw materials to the delivery of finished products to ensure that every tin box shipped meets customer expectations. After passing the quality inspection, the finished tin box will be carefully packaged, and the matching handbag will also be packaged together to ensure that it is not damaged during transportation.

### **Summary**

This [double-layer gift tin box](#) is an innovative work of our factory in the field of gift packaging. Through advanced production technology and sophisticated design concepts, we have successfully created a tin box product that is both practical and beautiful. Whether it is used for holiday gift packaging or business gift giving, this double-layer gift tin box can show high-end quality and unique artistic charm. We look forward to providing more customers with high-quality tin box products to help them meet their gift packaging needs.
